

# Egyptians

Egypt

Egypt is located in the North of Africa.

## Why was the river Nile so important?

Every aspect of life in Egypt depended on the river - the Nile provided food and resources, land for agriculture, a means of travel, and was critical in the transportation of materials for building projects and other large-scale developments.

## What have we already learnt?

In Year 2, children learnt the names of the 7 continents- this helps the children to visualise where in the world Egypt is and which continent it is in.

Knowing the compass points from KS1 and knowing how to use an Atlas will help the children to describe Egypt's location.

## The Sahara Desert

Lizards, camels, foxes and gazelles live in the Sahara.

It is the largest desert in the world.

Vocabulary	Definition
European countries	A country in the continent Europe.
Locate	Find the exact location/ place.
Settlement	The act of going to live in a new place where few people have lived before.
