

Tudors

Counties within the UK.

What have we already learnt?

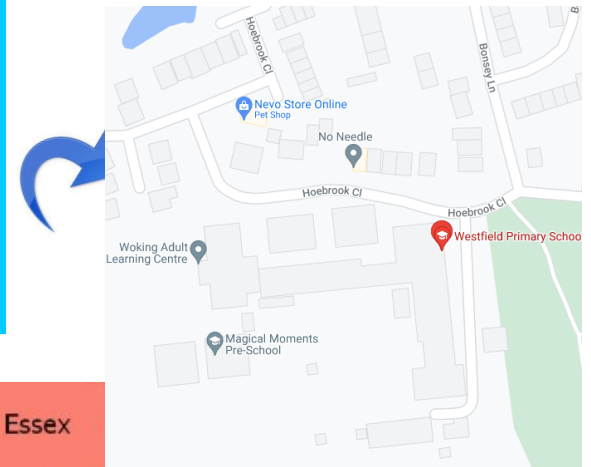

Children have already learnt the 4 compass points- they are familiar with the language used to give instructions using a 4 compass point compass.

Children locate counties and cities in England to develop an understanding of the country/ county they live in. They understand where they live in relation to the capital cities in the UK and know which counties border the county they live in. This builds on key geographical knowledge acquired in Year 2.

Vocabulary	Definition
County	The UK is split up into counties.
City	A large town.
Settlement	The act of going to live in a new place where few people have lived before.
Route	From a starting point to a destination.
Eight compass points	Used for navigation or describing the location.

You can use the eight compass points to create a route to get from one place to another.

Have a go at creating a route to get from Westfield Primary school to the pet shop.

We live in the county Surrey.
