

# History of Space

## You have already learnt...

Last term, you learned about the Victorian times. You learnt about the comparison between rich and poor people at that time and how life worked for different people. You also learned about all of the amazing inventions during the Victorian times in preparation for learning about how space exploration impacted the world.

## Key Skills

Know about a period of history that has strong connections to their locality and understand the issues associated with the period- space travel  
Using facts and evidence to compare

## Next you will learn...

Next term you will learn about the Vikings and how they voyaged to England to invade. You will learn about how invasion has impact on a country.

## Key Vocabulary

<b>Sun</b>	A huge star that Earth and the other <b>planets</b> in our solar system orbit around.
<b>star</b>	A giant ball of gas held together by its own gravity.
<b>moon</b>	A natural <b>satellite</b> which orbits Earth or other <b>planets</b> .
<b>planet</b>	A large object, round or nearly round, that orbits a <b>star</b> .
<b>sphere</b>	A round 3D shape in the shape of a ball.
<b>spherical bodies</b>	Astronomical objects shapes like <b>spheres</b> .
<b>satellite</b>	Any object or body in space that orbits something else, for example: the <b>Moon</b> is a <b>satellite</b> of Earth.
